A message from Cheryl Thompson about her husband, Ray Thompson:
 Six months after the heart attack and stroke: Ray has had a stent put into an artery, and to look at him, you cannot see anything physically wrong. He is more active and becoming more independent, except for his vision. This is still very limited, and he can literally only see what he looks at. Nothing around, above or below, or behind what he is looking at. This of course means that he cannot drive. But, we are managing this. We must thank all who have been praying for him, whole heartedly. We could not have got through this without our caring church family, and the concern which has been shown by all. Once again, thank you everyone, we are blessed to be a part of St. John's.
